

A Legacy of Excellence

From its humble beginnings in 1971 with a single concrete sleeper plant, Patil Group has evolved into a leading provider of comprehensive precast and railway solutions, driving some of India's most ambitious infrastructure initiatives. Today, our expertise spans high-speed rail, metro networks, smart cities, and large-scale urban and industrial projects. Renowned for our innovative railway track engineering and advanced precast systems, we remain committed to delivering world-class quality, pioneering solutions, and shaping the foundations of a modern, connected India. With every project, we build not just infrastructure, but enduring value for generations.

Our Expertise

Comprehensive Track Solutions:

Ballast-less tracks, concrete sleepers, advanced rail fastening systems and rail welding solutions.

Precast for Every Sector:

High quality precast elements for infrastructure, industrial buildings and workers housing projects.

Backward Integration:

In-house production of SGCI inserts, HTS wires, and other key components ensuring consistent quality and supply.

In-house Design Team:

Crafting tailored, project-specific solutions with precision and efficiency to meet diverse client requirements.

Dedicated R&D Unit:

Driving innovation through continuous experimentation and technology adoption to enhance product performance and quality.

Our Infrastructure Strength

20+ Manufacturing Facilities strategically located across India.

7 Crusher Units with 200+ acres of prime mining land.

Diamond Quadrilateral Delivery Network enabling rapid supply.

Wherever you are, we are within your reach!

Engineered Today For a Better Tomorrow

Box Culverts

Precast box culverts designed for efficient utility distribution and load bearing performance in rail, road and drainage applications.

U-Drains

Engineered for rapid storm and waste water management, our U-Drains ensure smooth flow and easy maintenance in utility and infrastructure projects.

Beams & Columns

Precision - Moulded precast beams and columns that offer high durability and faster assembly at site.

Walls

Durable and modular precast wall panels suited for boundry, security and retaining applications.

Toilet Blocks

Portable and hygienic precast toilet blocks tailored for urban, rural and industrial smart city sanitation projects.

Noise Barriers

High - performance acoustic walls engineered to minimize sound pollution near highways and railway corridors.

Road Barriers

Precast road medians ensuring safer traffic segregation with easy installation and relocation features.

RE Walls

Mechanically stabilized precast RE walls enabling faster slope construction with high structural performance.

Platform Walls

Precast platform walls tailored for railway stations, offering uniform finish and long term durability.

Septic Tanks

Leak proof precast septic tanks designed for long service life and minimal maintenance in decentralized sewage systems.

Output Headquarter Address:

Legend Apartments, 6-3-1342/4, Raj Bhavan Rd, Raj Bhavan Quarters Colony, Somajiguda, Hyderabad, Telangana 500082
